Wi-Fi Batten

Smart Wi-Fi LED Batten

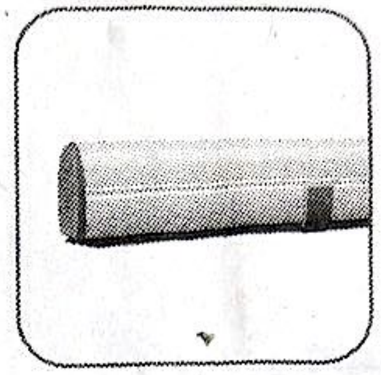
WiZ
CONNECTED

Scanned by Camera Scanner

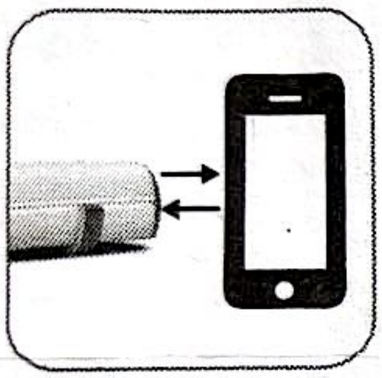
1. Download the free app
Search for "WiZ Connected"

GET IT ON Google Play

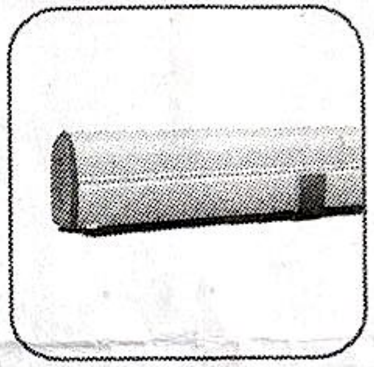
Download on the App Store



2. Install a batten
Fix the batten into the wall and switch it ON



3. Pair light
Ensure your smartphone is connected to your home Wi-Fi network and the Bluetooth feature is enabled, and after that open the Wiz app and follow the on-screen instructions to complete the setup



4. Enjoy your light
Dimmable and Tunable white light to create your desired ambiance at home

Please Note:

1. **Important** – After successful pairing, to ensure the product retains the last set mode/brightness after a power outage, please ensure below:

   A. Under Settings, **"WIZ Click"** feature is turned **OFF** and;

   B. Under Settings, **"Power Outage Recovery"** feature is turned **ON**

2. Once power/Wi-Fi resumes after a power outage, allow approximately 5-10 secs, for the product to pair again with the Wiz Connected App and be available for tuning/dimming controls from the mobile App

3. It is always preferable to connect via a Wi-Fi router (please avoid Mobile Hotspot).
4. For best results, always switch on/off the batten via the Wiz Connected app instead of the mains switch for a seamless experience.
5. **Troubleshooting** – Please visit https://www.wizconnected.com/en/consumer/support/ for FAQs and further support.
